

Successful Trenchless Asia 2002

At Trenchless Asia 2002, 100 companies from 17 different countries displayed wide ranging technology that focused on the latest means and solutions available in the installation and repair of utilities with minimal surface disruption. The event took place at the Hong Kong International Trade and Exhibition Centre from 12 to 14 November.

This event was the first such specialised one and attracted 1,600 delegates. Papers that were presented included An Overview of Trenchless Technology, Location and Detection, Rehabilitation of Pipelines, New Installations and Case Studies, prompting active dialogue with the audience. There was also a site visit to a Swagelining contract in progress for Hong Kong's Towngas.

Trenchless Asia 2002 was sponsored by the growing China Hong Kong Society for Trenchless Technology (CHKSTT) and the ISTT. The event was organised by UK-based NO-DIG Conference and Exhibitions Ltd, which has staged international NO-DIG and Trenchless events in the UK, Far East and Middle East since launching the inaugural show in London back in 1985.

Trenchless Asia 2002 took place at the Hong Kong International Trade and Exhibition Centre from 12 to 14 November.
