

China Hong Kong Society for Trenchless Technology

Workshop on
"Waterline® Stainless Steel Close-fit lining Technique"
in Huizhou

Date : 1st September, 2007 (Saturday)
Time : 10:00 – 18:00
Location : Huizhou, China (惠州)

Content Highlight:

The demand for watermain rehabilitation works in Asia Pacific is rapidly growing; however, the range of lining materials in the market is quite restricted. Waterline® Stainless Steel Close-fit lining patented technique was tailor-designed for the watermain rehabilitation industry without contamination of the water.

Session 1: Technical Seminar

The speaker will talk about the Waterline stainless steel lining technique in detail in the 1 ½ hour-seminar. Topics to be covered include: introduction of this patent technology, working procedures, pipe pre-fabrication, TIG welding technique and control, liner insertion procedure, grouting and pipe testing.

Session 2: Site Visit

The site demonstration is in Huizhou. Target pipe is DN800 cement pipe and length to be rehabilitated is 420m.

The workshop is intended to be beneficial to engineers, consultants, contractors, operators and any others who engage in the pipe rehabilitation market, especially those working in the water industry.

Programme Schedule

Date : 1st September, 2007 (Saturday)
09:00 Pickup by bus coach from Hong Kong (pickup location to be confirmed)
11:00 Arrival to Huizhou
11:00 - 12:30 Technical Seminar on Waterline® Stainless Steel Lining Technique
12:30 - 14:00 Lunch
14:00 - 16:00 Site Demonstration
16:00 - 18:00 Bus coach back to Hong Kong

China Hong Kong Society for Trenchless Technology

About the Speaker

Speaker: Mr. Benson Xian Jun-Fung

The speaker of the seminar Mr. Benson Xian has over 20 years experience in water industry of China. He, the inventor of Waterline® technology, is the current President of Jindi Double-Dimension Pipe Lining Technology Co. Ltd., and the market leader of the watermain rehabilitation industry in China. With successfully patented technology in both China and HKSAR, Waterline® is the one and only one rehabilitation method by using stainless steel as the primary material in the market.

Medium : Mandarin

Fee : Individual member – HKD150.00/person
Corporate member – HKD150.00/person for first two designated individuals
HKD300.00/person for any additional designated individuals
Non-member – HKD300.00/person

Remarks : Fee including round-way transport by bus and a lunch

Organizer :  China Hong Kong Society for Trenchless Technology

Waterline Technology Engineering Ltd.
